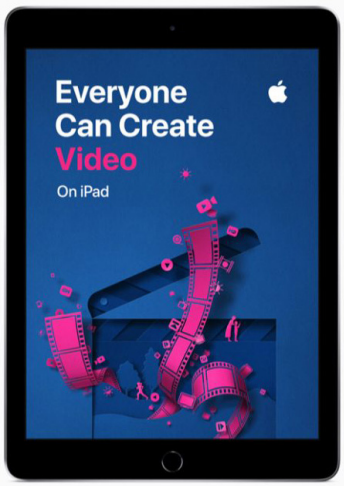
Apple's FREE "Everyone Can Create" collection provides teachers the ability to easily incorporate creativity with their existing lesson plans for any subject area.

Video gives students a powerful means of interpreting ideas, expressing their thoughts, informing, influencing, and inspiring their audience.

In this class, you will be shown how to use your iPad camera and the "Clips" app to capture video and create stories of your own. Composition, lighting, camera angles, and pacing will be covered. You'll learn how to establish setting to construct strong narratives through documentaries, live events, and short films. Time will also be spent learning to integrate your videos into "Pages" and "Keynote".



***An iPad is required for this class. Please be sure to bring one with you.**
