A *Sixth Grade* Series for Creating a Powerful Science Classroom

Putting It All Together

Curriculum, standards, assessment, instructional strategies, science practices: How do we put it all together in a way that makes the science come alive for your students?

These sessions are structured to address your questions when you need answers most.

- How do you apply the CA Science Framework?
- How do you develop students with a deep understanding of science?
- How do you implement powerful strategies to support all learners?

This four-day series is designed to provide year-long support and opportunities to collaborate with other 6th grade teachers to empower student science learning.

Attend the entire series or select individual sessions.

Session 1: Systems and Subsystems of Organisms - July 16, 2019

Session 2: Energy and Earth System Interactions - October 4, 2019

Session 3: Variation and Heredity - January 31, 2020

Session 4: Effects of Global Warming on Earth's Systems - March 23, 2020

TIME:
8:30am to 3:30pm
