## Increasing Student Engagement Using Virtual Math Manipulatives

In a distance learning setting, students and teachers face new challenges. How do we put math tools in the hands of students? What does it look like to teach, interact with, and share ideas using virtual manipulatives?

This session will explore ways to use virtual manipulatives in order to engage students during asynchronous and synchronous learning. Providing all students access to the tools they need is critical to their success.

Zoom link will be sent upon registration.
