A Night at the 21st Century Museum

This event is an opportunity for schools to showcase students’ exemplary Project Based Learning (PBL) experiences by providing a forum for students to present their work and receive feedback from an appreciative public audience!

Teachers and students are encouraged to submit high quality projects from all content areas. Presentation modes may include live performances, displays, digital media, and any other creative and unique way to demonstrate 21st Century Learning and/or communicate an innovation or solution to a problem.

Museum patrons will experience how Common Core State Standards implementation is transforming learning and teaching in a rigorous and relevant way.
